FBI Cellular Analysis Survey Team Training Presentation (C.A.S.T.)

The training presentation will cover cellular analysis as an incredibly powerful investigative tool and the utilization of cell site data with a detailed understanding of when and how it can be applied in investigations. This training will include a review/refresher of data capabilities, misconceptions, courtroom application, and how to request CAST assistance.

The training is conducted by Special Agent C. Nicole Robertson, Federal Bureau of Investigation who is detailed to the Indianapolis Field Office from Washington DC Headquarters. SA Robertson is a member of the Cellular Analysis Survey Team (C.A.S.T.) and the Digital Imaging & Video Recovery Team (D.I.V.R.T.)
